Print-only specifications

Newsletter

- Sizes: 8.5 inches x 11 inches or 8.5 inches x 14 inches
- File Type: PDF. Please note that we cannot use a Publisher file.
- Our printer cannot print edge-to-edge. Please leave at least an 1/8-inch border around the newsletter to ensure nothing is cut off when it is printed.
- Please make sure you have the current logo. If you're not sure, go to www.wgm.org/logo to compare and download if you need our updated logo.
- Export your file at the highest resolution possible. This will ensure your letter is printed at its best quality based on what you submit.

Prayer Card

- Custom designed prayer cards from an outside designer can add 2–4 weeks to the turn around time, due to possible printing issues resulting from files being incompatible with our software. We encourage the use of our templates if possible.
- If, however, you prefer to use an outside designer or design your own, below is what we need in order to produce your prayer card:
 - Size: 3.75 inches x 5.5 inches with crop marks and an 1/8-inch bleed all the way around the file
 - Type of file: PDF
 - Your file should be a few megabytes. If it is lower than that, print quality will be poor.
 - Separate files for the front and back
 - Please make sure you have the current logo. If you're not sure, go to www.wgm.org/logo to compare and download if you need our updated logo.
 - Please note that we can no longer ask for credit/debit card information on response cards.
