Biography

Throughout our years of missionary service, we've focused our ministry on education that transforms lives. From Honduras to Bolivia to Albania, our desire has always been to see young men and women fully committed to the Lord, firmly grounded in their knowledge and faith and filled with a love for God and their neighbor.

Education is more than just providing information; it is challenging students to become learners. Offering a bilingual, Christian education to students is not only an opportunity to provide a quality academic education but it also teaches and models what it means to become a disciple who can impact his or her community for Christ.
